(54) METHOD FOR INFORMING OF CALLED SIDE LOCATION IN PORTABLE TELEPHONE

(57)Abstract:

PROBLEM TO BE SOLVED: To make it possible to inform a caller of the location area of a called side portable telephone before connecting a call by sending portable telephone location informing announcement from an intra-zone mobile communication exchange to a transmission side fixed telephone set before connection with the portable telephone.

SOLUTION: In the case of sending a ringback tone to a fixed telephone set, a sound source 51 is connected to a talking line 9. Namely a location area announcing device 52 has a function for transmitting a location area announcement to the line 9, the sound source 51 has a function for transmitting a ringback tone to the line 9 and an intra-zone mobile communication exchange 5 receiving a transmission signal connects the device 52 recording the location announcement so as to inform of it to the line 9 and informs the transmission side fixed telephone set of the location area announcement. When a cut-off instruction is not generated from the transmission side fixed telephone set after informing of the location area announcement, an incoming side portable telephone is called, and when the portable telephone is in a talking enabled state, the sound source 51 is connected to the line 9 to transmit a ringback tone to the transmission side fixed telephone set.
